Release 1.0

2011, Hexagon IT

September 05, 2011

CONTENTS

hexagonit.virtualgallery is a Plone add-on that renders a Flash-based 3D virtual gallery.

INSTALLATION

To install *hexagonit.virtualgallery* you simply add `hexagonit.virtualgallery` to the list of eggs in your buildout, run buildout and restart Plone. Then, install *hexagonit.virtualgallery* using the Add-ons control panel.

USAGE

2.1 Basic usage

This package adds the *Virtual 3D gallery* display mode to Folder and Collection. So, go to any folder or collection that contains images and select *Virtual 3D gallery* from the display drop-down menu. That's it!

2.2 AJAX usage

You might want to display the gallery somewhere else or possibly in a toolbarless new window. To keep all Plone stuff away from the virtual gallery use a URL like below to only get the title of the gallery and the Flash object that displays it:

```
http://<path>/<to>/<your>/<gallery>/<folder>/virtualgallery?ajax_load=1&ajax_include_head=1
```

TODO

- translations
- cross-browser testing
- use in the wild

CREDITS

- Idea, skeleton and sponsoring provided by Hexagon IT Oy.
- Flash part of the gallery developed by Michal Zwieruho, BlackMoon Design.
- Plone integration by Nejc Zupan, NiteoWeb Ltd.
